

GM de México recognizes the quality of its suppliers

2017-09-07

- 94 suppliers in Mexico were recognized for their excellent performance in quality

Mexico City - General Motors de México awarded the Mexican Supplier Quality Excellence Award of Mexico 2016, in which it recognized 94 Mexican suppliers for outstanding performance in quality

"For General Motors it is a great privilege to be able to work with the best suppliers in the industry. This award we deliver annually in Mexico, symbolizes our appreciation for their passion and commitment," said Ernesto M. Hernández, President and CEO of GM de México, "The work of suppliers is key for our vehicles to excel in the market by its quality and safety, permanent and non-negotiable commitments, which allow us to exceed the expectations of our customers."

Of the 94 recognized companies, 40% were awarded the prize for the first time, 20% for the second time, and 30% for the third, fourth or fifth consecutive time.

Additionally, the awards for Best Greenfield Development and Best Brownfield Development were presented. The first was awarded to suppliers who installed a new manufacturing site this year in a place where there was no previous infrastructure, including the installation of machinery and tooling, as well as the hiring of personnel.

In the case of the Brownfield award, it was awarded to suppliers who expanded or modified a pre-installed manufacturing site with new machinery and tooling and new work equipment.

The work of Mexican suppliers that is recognized through the Supplier Quality Excellence Award is critical not only for the successful operation of the 4 Manufacturing Complexes that General Motors has in Mexico, but GM's operations globally.
